# concept: graphic design portfolio

- scrapbook/collage style
- one long page with multiple sections, nav bar at top that jumps to a certain point & some header that stays at the top of the page when scrolling
    - about/resume w/ links, portfolio, end with contact

inspiration

tegar septiady

Untuk feed Instagram Realtime Clothing, saya menciptakan desain ceria dengan memadukan warna-warna untuk menampilkan kesan energik dan fun. Visual ini bertujuan untuk menarik perhatian anak muda yang ingin tampil beda dengan desain kaos kreatif dan unik, sekaligus menggambarkan bahwa Realtime Clothing adalah pilihan tepat untuk gaya yang penuh ekspresi.

Untuk proyek 3D desain, saya membuat replika kamar saya sendiri sebagai eksperimen dalam mengaplikasikan elemen-elemen desain 3D.

various pinterest inspo

already learned / need to learn

- flexbox, grids
- relative/absolute positioning
- z-index

- get header navbar text to change after scrolling past certain point on page
  - about → project a → project b → contact
- gradient/color shifting background
- items to scroll at different rates?
- javascript event listeners
- rotating/animating images

wireframe

some big fancy text that says
< "welcome to my portfolio" >
i'll make in illustrator

jump to: about   project a   project b   project c   contact

experience

about me

just random shapes from canva. hopefully the final version won't look this ugly
